

ARJUN SINGH PANWAR

+91-7049465942 | arjunspanwar07@gmail.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

Aspiring software developer with hands-on experience building full-stack, backend, RAG, and machine learning projects. Proficient in C++, Python, SQL, JavaScript, REST APIs, and databases, with a strong foundation in Data Structures & Algorithms and a 1850+ LeetCode rating.

EDUCATION

National Institute of Technology, Tiruchirappalli

Master of Computer Applications (M.C.A.)

2027

CGPA: 8.21

ACHIEVEMENTS

- Achieved **Knight badge** on LeetCode with a rating of **1850+**, demonstrating strong competitive programming and algorithmic problem-solving skills.
- Secured **AIR 51** in **NIMCET 2024** among **25,000+** candidates, earning admission to **NIT Trichy MCA**.
- Secured **Rank 1** in Ujjain **District in Class X** and was awarded by the **District Collector**.
- Received a **Merit Scholarship** from Baba Jayguru Dev Foundation for outstanding academic performance.
- Earned **HackerRank certifications** in SQL and Problem Solving.

PROJECTS

CampusVault – Academic Resource Sharing Platform

Mar 2026

- Built and deployed a full-stack academic resource sharing platform using React.js, Node.js/Express.js, MongoDB, and Cloudinary, serving 100+ active students with 200+ uploaded study materials.
- Integrated secure JWT authentication with role-based access control, email verification, and scalable REST APIs for search, filtering, and bookmarking.
- Developed interactive student tools including contribution leaderboards, batch directories, and a GPA calculator.

AskMyDoc – Context-Aware Personal Document Assistant

Jan 2026

- Built an end-to-end document question-answering platform using Python, FastAPI, LangChain, and ChromaDB for semantic Q&A over PDF, TXT, and CSV files with source citations.
- Engineered an automated RAG pipeline using HuggingFace embeddings and local Ollama (Mistral 7B) for low-latency retrieval (<100ms), and integrated RAGAS evaluation to detect hallucinations.

ChurnSense – Customer Churn Prediction System

Nov 2025

- Built an end-to-end telecom churn prediction platform with Python, Scikit-Learn, and FastAPI, achieving 94.16% accuracy.
- Engineered an ML pipeline for data preprocessing and feature extraction, applied SMOTE for class rebalancing, and deployed the live application to Hugging Face Spaces.

TECHNICAL SKILLS

Languages: C++, Python, SQL, JavaScript, HTML5

Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS, FastAPI, LangChain

Databases: MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, VS Code

Core CS Fundamentals: Data Structures & Algorithms, Operating Systems, OOP, DBMS

POSITIONS OF RESPONSIBILITY

Volunteer – VERSION'25 (Public Relations Committee), NIT Trichy

Mar 2025

- Assisted in organizing promotional campaigns, student outreach, and cross-team coordination to support the successful execution of VERSION'25.

Class Representative – BCA, SIBS Indore

- Served as the point of contact between students and faculty, coordinating academic communication and addressing student concerns.
